Question :

Write a code and connections in wokwi for the ultrasonic sensor. Whenever the distance is less than 100cms send an “Alert” to IBM cloud and display in the device recent events.

Code:

```
#include <WiFi.h>
#include <PubSubClient.h>
void callback(char* subscribetopic, byte* payload, unsigned int
payloadLength);
//-----credentials of IBM Accounts-----
#define ORG "60unel"//IBM ORGANITION ID
#define DEVICE_TYPE "ESP32"//Device type mentioned in ibm watson IOT
//Platform
#define DEVICE_ID "05112001"//Device ID mentioned in ibm watson IOT Platform
#define TOKEN "bs@u5NgP+a59QWqaW" //Token
String data3;
char server[] = ORG ".messaging.internetofthings.ibmcloud.com";
char publishTopic[] = "iot-2/evt/Data/fmt/json";
char subscribetopic[] = "iot-2/cmd/test/fmt/String";
char authMethod[] = "use-token-auth";
char token[] = TOKEN;
char clientId[] = "d:" ORG ":" DEVICE_TYPE ":" DEVICE_ID;
WiFiClient wifiClient;
PubSubClient client(server, 1883, callback ,wifiClient);
const int trigPin = 21;
const int echoPin = 19;
#define SOUND_SPEED 0.034
```

```

The screenshot shows the IBM IoT Platform console interface. On the left is a dark sidebar with various icons. The main area has a top navigation bar with tabs: 'Browse', 'Action', 'Device Types', and 'Interfaces'. A blue 'Add Device' button with a plus icon is on the right. Below the navigation bar, there's a sub-header with tabs: 'Identity', 'Device Information', 'Recent Events' (which is selected), 'State', and 'Logs'. A close button 'X' is on the far right of this sub-header. The main content area contains a text description: 'The recent events listed show the live stream of data that is coming and going from this device.' Below this is a table with four columns: 'Event', 'Value', 'Format', and 'Last Received'. The table contains four rows of data, all with 'event_1' in the 'Event' column and 'a few seconds ago' in the 'Last Received' column. The 'Value' column contains JSON strings: ["distance":7,"Alert":"Distance less than 10"], ["distance":9,"Alert":"Distance less than 10"], ["distance":8,"Alert":"Distance less than 10"], and ["distance":9,"Alert":"Distance less than 10"]. The 'Format' column contains the value 'json' for all rows.

Event	Value	Format	Last Received
event_1	["distance":7,"Alert":"Distance less than 10"]	json	a few seconds ago
event_1	["distance":9,"Alert":"Distance less than 10"]	json	a few seconds ago
event_1	["distance":8,"Alert":"Distance less than 10"]	json	a few seconds ago
event_1	["distance":9,"Alert":"Distance less than 10"]	json	a few seconds ago
