## PROJECT DESIGN PHASE-II TECHNOLOGY STACK (ARCHITECTURE & STACK)

| Date          | 11 October 2022                 |  |
|---------------|---------------------------------|--|
| Team ID       | PNT2022TMID07710                |  |
| Project Name  | IOT Based Real-Time River Water |  |
|               | QualityMonitoring and Control   |  |
|               | System                          |  |
| Maximum Marks | 4 Marks                         |  |

## **Technical Architecture:**

The Deliverable shall include the architectural diagram as below and the information as per the table 1 & table 2

**Table-1: Components & Technologies:** 

| S.No | Component                       | Description                     | Technology                                      |
|------|---------------------------------|---------------------------------|---|
| 1.   | User Interface                  | Web UI, Mobile App              | Node – Red, Kubernetes, MIT mobile app inventor |
| 2.   | Application Logic-1             | Generate random data            | Pytho   |
|      |                                 |                                 | n   |
| 3.   | Application Logic-2             | Generate random sensor data     | IBM Watson IOT Platform                         |
| 4.   | Cloud Database                  | Database Service on Cloud       | IBM DB2, IBM Cloudant,                          |
| 5.   | External API-1                  | Send SMS to customer            | Fast SMS API                                    |
| 6.   | Infrastructure (Server / Cloud) | Application Deployment on Cloud | Cloud Foundry, Kubernetes                       |

**Table-2: Application Characteristics:** 

| S.No | Characteristics          | Description                               | Technology                     |
|------|--------------------------|---|--------------------------------|
|      |                          |   | N 1 P 1 P 1                    |
| 1.   | Open-Source Frameworks   | open-source frameworks used to            | Node – Red, IBM                |
|      | 1                        | develop ourproject                        | Cloudant, IBMWatson IOT        |
|      |                          |   | Platform                       |
| 2.   | Security Implementations | Use of Login facility with username and   | Password protection in MIT App |
|      |                          | passwordfor individual user               |                                |
| 3.   | Scalable Architecture    | Web Ui designed for use in Mobile and     | Node – Red (Web UI)            |
|      |                          | computer                                  | , ,                            |
|      |                          | with adaptive screen size                 |                                |
| 4.   | Availability             | Available for the user in both web UI and | Node – Red(Web UI), MIT        |
|      |                          | Mobile App                                | App(Mobile App)                |
| 5    | Performance              | Give accurate results and immediate alert | Node – Red(Web UI), MIT        |
|      |                          | in case of contamination of water         | App(Mobile App)                |
